WHERE LIGHT AND SOUND MANAGEMENT MEET, COMFORT & WELL-BEING IS CREATED.

Light and acoustics are judged as critically important factors in creating comfort & well-being. Studies have shown that the acoustics and the lighting of a space have a significant impact on productivity, as well as on how a space is experienced.

ArchilumO has developed an acoustic lighting platform where function meets form, where beautifully designed lighting and acoustics work towards optimally lit space conditions and balanced room acoustics that enhance human well-being.
